DECLARATION “IV”
Technical and Protection Information in Respect of
Consignments of Group 2 Radioactive Substances
on Vessels Transiting SC
(Page 1)

(All items must be completed. If any of the items in this statement is not applicable, the letters “N.A.” should be inserted).

Name of vessel: ................................ Nationality: ....................
Master’s Name: ................................
Port of entry: ...................... Date of transit: ...............  
Port of loading: ...................... Port of destination: ............... 

(1) Regulations according to which the packing is prepared for transportation.

(2) Appropriate information related to the radioactive material:
   a) Material and group ............................................................
   b) Activity in M.C. per package ..............................................
   c) Physical and chemical state ..............................................
   d) Max. temp. at the surface of the package during transport ........
   e) Encapsulated state (1).

(3) Required information on packages characteristics. (Similar packages with same contents should be mentioned together with indication of their marks and serial numbers):
   a) Marks and serial number ..................................................
   b) Type of packing .............................................................
   c) Packing category ...........................................................
   d) Dimensions in cm (indicate whether it is large radioactive source).
   e) Weight .................................................................

(1) If encapsulated state, indicate date and competent authority which approved the encapsulation.

(Page 3)

(4) Radiation level in mrem equivalent per hr. at:
   a) External surface ...........................................
   b) One meter from external surface .......................  
   c) Two meters from full load ...............................  

(5) Precautions required on a routine basis.

(6) Precautions to be taken in case of accident.

(7) Number, date and competent Authority issuing the packing certificate.

(8) Stowage conditions of packages (where and how).

(9) Depth of screening by other cargo.

(10) Statement of presence of:
   a) External materials.
   b) Inflammable materials.
   c) Spontaneously inflammable materials.
   d) Corrosive materials.
   e) Oxidizing materials.
   f) Compressed gases.
   g) Liquefied gases.
   h) Any other materials.

N.B.: For large radioactive sources, only items from 1 to 8 should be filled and forwarded to the Suez Canal Authority before the vessel leaves her port of loading.
The following certificate must be signed by the technical person responsible for these shipments and recognized by the Master of vessel on behalf of the ship owner:

“We the undersigned certify that the information given in 1 to 11 is surely correct and that the packing of radioactive materials and marking and labeling on the packages are in accordance with”.
